

EDM DRESSING WIRE

INDUSTRY:

MACHINE &

MACHINED MATERIALS:

Metal-bonded diamond and CBN grinding wheels

DESCRIPTION:

Profiling/Dressing of metal-bonded diamond and CBN grinding wheels.

FEATURES & BENEFITS:

Precise profiling:

- ▶ Achieve high durability and increased feed rates with precise profile adjustments

High-performance agility:

- ▶ Customized for robust tools with an open pore structure and increased grain protrusion for outstanding grinding performance

Cost-effective innovation:

- ▶ Revolutionise your process by eliminating expensive dressing roller while modifying profiles effortlessly

Flexible customisation:

- ▶ With simple profile changes you can easily adapt to different needs, ensuring seamless customization

Efficiency redefined:

- ▶ Redefine productivity with customized profiles that maximize both durability and feed rates and therefore optimizing performance

TOOLS:

Grinding wheel diameter:

- ▶ Up to Ø250mm
- ▶ Accuracy depends on the grit size
- ▶ Minimum inner radius depends on wire Ø
- ▶ Standard R0.25 for wire Ø0.2mm
